

Custom generating sets for the worldwide oil and gas industry

Capability

- Safe area, Class 1 Div. 2 or ATEX Zone 2
- Fire rated A0 through H120
- Emergency Generating sets , 50 & 60 Hz, 208Vac, 3 phase through 15KV – *see photo above right*
- Unmanned platform prime power - typ 25kWe through 250 kWe using air cooled engines with proven 2000 hour (3 month continuous operation) service interval adaptations - *see photo above left - IP56, 2000hr service, 85dB(A)@1 mtr, A60 fire rated.*
- High noise attenuated, compact, low weight and foot print solutions
- Up to IP56 enclosed packages (severe weather – pressure jets from all directions/ salt filtering)
- Reciprocating engine prime movers - Diesel and Natural Gas
- Engineered Solutions
- Consultancy services – Specialist support in respect of Generating Set design, Acoustic survey, Layout design, Package Design, Generating set failure analysis and operational support of prime power applications.
